

KAISER ALUMINUM

Wire & Rod Products

In 2010, Kaiser Aluminum acquired the Nichols Wire 250,000 square foot manufacturing facility and assets in Northern Alabama. The facility is recognized as the world's largest, as well as leading manufacturer of bare mechanical alloy wire products. Aluminum nails and rod are also produced.

Markets are serviced through direct sales to OEM's and indirect sales through processors and distributors. Our broad product range services an active export market. End use markets include transportation, aerospace, marine, building/construction, consumer durables and electrical.

The Quality Assurance Systems and Programs are based on the conditions and quality system requirements stated by ISO 9001 : 2008.
